## Canberra selects ASL for Control Panel Assembly

Assembly Solutions is delighted to have been chosen as the main contractor for Control Panel and Cable Assembly work for Canberra. These complex panels are used in the demanding environment of Nuclear power stations to detect radioactive leaks. ASL is responsible for the full assembly and testing of the mechanical and electrical items.

This project calls upon a wide range of ASL skills, cable assembly, wire harnesses, panel build, metal fabrication, precision engineering, testing and project management. The importance of first class Quality Control is rarely more evident than safety critical products used in a Nuclear Power Station.

Canberra's Manufacturing Manager Geoff Barton said 'We selected ASL because they are competitive, technically competent, very keen and flexible.'
