

Case Study:

Optare UK Ltd

Optare select ASL for Hybrid Bus Wiring Looms

Assembly Solutions is delighted to have been selected as the Wiring Loom manufacturer for Optare's hybrid buses. Optare secured the £13million order for 66 hybrid buses from the Greater Manchester Integrated Transport Authority. Optare have said "This is the biggest single order for hybrid buses placed in the UK."

The project involved a team of 5 staff at ASL's Bolton factory. A key aspect in winning this business was ASL's ability to work with very short lead times and cope with last minute technical changes.

Optare's Purchasing Manager Chris Fillingham said "We are delighted with ASL's commitment to deliver goods on time and being able to deliver with such short notice. Their strong development and prototyping department is also something we highly value."
