WH Bence Coachworks

ASL wins £40k 'Plug & Play' wiring contract from Bence

Assembly Solutions was recently selected by Bence to redesign its vehicle wiring harnesses and control panels into a 'Plug & Play' solution. Initially the contract is to supply 20 specialty vehicles which incorporate a high complexity of satellite communication equipment.

The project involves a high degree of on site vehicle surveys and documentation which can then be reproduced on CAD. ASL can then reproduce the control panels and wire harnesses in an identical 'plug & play format for each vehicle'.

Bence Managing Director James Brown said "I am delighted, within days of my first phone call ASL had been to site, measured the vehicle and produced prototype panels and harnesses. We have cut our electrical assembly time by over 50% and reduced our lead time by over 2 weeks."
