

# Quickwire<sup>TM</sup>

Plug & Play Solutions

What, Why, Where

## What is it?

**Quickwire** is a Plug and Play Wiring Kit which is ideal for the electrical wiring of exhibition stands. So simple to use, for shell schemes or one off complex stands.

## Why use it?

- **A major time saver**  
**Quickwire** reduces time spent cutting and terminating cables, so you can install the electrics in no time at all.
- **Low cost**  
**Quickwire** kits are reusable so there is no waste, no mess and it's so simple anyone can install it. You only need an electrician to do the final test and inspection.
- **Right First Time**  
With the **Quickwire** system, the entire kit can be tested in the factory before delivery ensuring the system always works first time every time.
- **Flexible**  
The Plug & Play nature of this wiring system enables it to be very flexible allowing last minute alteration to be made very quickly. Sockets and lights can be moved with ease and with minimum disruption. The flexible nature of these kits enable them to be used on a wide range of stand designs.
- **Great Lighting**  
A great stand needs great lighting and ASL offer a wide range of the latest low power long life LED and traditional lighting to show off your stand. All offered with Plug & Play sockets for quick installation.

## Where can you use it?

**Quickwire** can be used at any exhibition or temporary similar installation.
